

Contrafechos para cremonas de correr

Funcionalidade & design discreto com resistência à corrosão

Novos Contrafechos para cremonas de correr

Funcionalidade & Design discreto com resistência à corrosão

Os novos contrafechos para fechamento multiponto aplicados em portas e janelas de correr da Roto Fermax são fabricados em **Aço Inox SS304** e poliamida, sendo ideais para obras localizadas em regiões litorâneas.

- Design discreto;
- Acabamentos base poliamida: preto e branco;
- Compatíveis com perfis em Alumínio e PVC;
- Aço Inox SS304: resistente à corrosão;
- Fácil instalação;
- Resistência mecânica;
- Compatível com cremonas Roto agulha de 7mm e 17mm;
- Ideal para regiões litorâneas.

Inox SS304

Poliamida

Uma nova opção

Os contrafechos em Inox possuem as mesmas aplicações dos contrafechos fabricados em Zamak. Confira na tabela abaixo a equivalência entre eles:

Tabela de equivalência

Zamak	Inox / Preto	Inox / Branco
617133	2040175	2040267
629551	2040268	2040294
